

FERNANDO EZEQUIEL GARCÍA

FULLSTACK DEVELOPER — BACKEND FOCUS (NODE.JS)

Misiones, Argentina | +54 3755 631020 | fernandoezequielgarcia@gmail.com | [github.com/Fernando2025A](#)

PROFESSIONAL SUMMARY

Fullstack Developer specialized in the **Node.js ecosystem** and **Backend architecture**. Hands-on experience designing, modeling, and building scalable, secure, and production-ready RESTful APIs using **NestJS, Express, and PostgreSQL**. Strong focus on writing clean code, relational database design, role-based security, and software engineering best practices.

TECHNICAL STACK

Backend: Node.js, NestJS, Express.js, REST APIs

Databases & ORMs: PostgreSQL, Prisma ORM, Redis

Frontend: React, Vite, TypeScript, Bootstrap

Languages: TypeScript, JavaScript, SQL

Security & Services: JWT, OAuth 2.0, Resend, Cloudinary

DevOps & Tools: Git, GitHub, Docker, Postman, Swagger

FEATURED PROJECTS

1. Punto Gestión — SaaS Platform

Live Demo: <https://puntogestion.online>

(DEPLOYED)

Comprehensive multi-business SaaS inventory management platform designed for merchants and small businesses.

- SaaS Architecture:** Built multi-business isolation features enabling independent management of product catalogs, stock levels, sales reporting, dynamic stock alerts, and suppliers.
- Backend Core:** Engine developed with **NestJS, Prisma ORM, and PostgreSQL** following modular architecture principles.
- Integrations & Media:** Integrated **Resend** for transactional email alerts/notifications and **Cloudinary** for cloud-based media and product image storage.
- Security & RBAC:** Session management via JWT, secure cookies, and fine-grained endpoint protection using custom NestJS Guards for role and permission control.

2. E-Commerce Simulator (Gaming Products)

Live Demo: <https://www.ferdevx.com>

(DEPLOYED)

Full online store platform for virtual gaming products, subscription tiers, and role management.

- Backend Development:** Engineered RESTful API with **NestJS, Prisma ORM, and PostgreSQL**.
- Authentication & Authorization:** Implemented JWT with secure Cookie-based authentication and Role-Based Access Control (USER, ADMIN, OWNER).
- Business Logic:** Designed dynamic inventory workflows, product categories, and tier-based user benefits.
- Frontend Integration:** Built responsive interface using **React, Vite, TypeScript, and Bootstrap**.

3. Cosmos Explorer

Live Demo: <https://cosmos.ferdevx.com>

(IN DEVELOPMENT)

Interactive astronomical catalog providing real-time data on space objects, news, daily trivia, and community features.

- Backend Architecture:** REST API powered by **NestJS, PostgreSQL**, and a **Redis** caching layer for optimal performance and high speed.
- Advanced Security & Auth:** Integrated Google **OAuth 2.0**, JWT, refresh token rotation, and HTTP-only cookies.
- Integrations:** Consumed specialized third-party space APIs and set up a transactional email system using **Resend**.

KEY STRENGTHS

- Rigorous backend focus and clean code principles.
- Scalable relational database modeling and optimization.
- API design, documentation (Swagger), and security enforcement.

EDUCATION

High School Diploma — Computer Science Track

B.O.P. N°40 — Misiones, Argentina (Graduated: 2025)

CERTIFICATIONS & ONGOING EDUCATION

- Node.js, Express & REST APIs:** FreeCodeCamp Certification.
- Version Control with Git & GitHub:** FreeCodeCamp Certification.
- TypeScript (Basic to Advanced):** Strict typing paradigms, OOP, and design patterns.
- NestJS Framework:** Complete Enterprise Backend Development.

LANGUAGES & AVAILABILITY

Languages: Spanish (Native) | Portuguese (C2 - Fluent) | English (B2 - Upper-Intermediate)

Availability: Open for Remote Work / Freelance / Relocation
